

Description du lieu

Architect's house built in 2013 in the heart of Montpellier. Easy access and parking in a residential and tree-lined area. Open and bright house with 75m² living room, American kitchen, 6m long bay window. Warm colour, raw concrete ceiling, green and welcoming patio, custom staircase. Access to the DRC is simple and easy for the equipment. A treatment room/office adjoins the living room.

On the 1st floor, an office, 3 bedrooms and 1 large SDB. All the rooms are bright.

For the record, my neighbors have a small outdoor restaurant, in a warm, tree-lined garden. They can also make themselves available for filming if needed.
